

Best Choice Roofing Maintenance Tips to Enhance Longevity in Extreme Weather

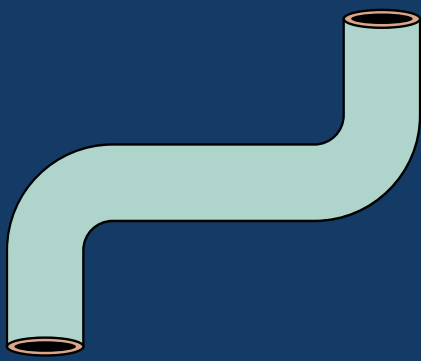

CONDUCT REGULAR INSPECTIONS

It's advisable to inspect your roof thoroughly at least twice a year as well as during significant weather events.

KEEP YOUR ROOF CLEAN

Leaves, branches, moss, algae, and other debris can accumulate on your roof and in your gutters

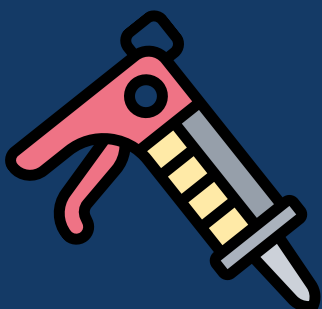

ENSURE PROPER DRAINAGE

Ensure that your gutters are free of blockages so that water can flow freely away from your roof and foundation

REPAIR DAMAGE PROMPTLY

Even small issues like a missing shingle or a minor leak can become severe problems. Call a professional

APPLY PROTECTIVE SEALANTS

In areas with high sun exposure, applying a reflective coating can help protect your roof. Periodically reapplying sealants can help maintain the integrity
